Summary

Experienced Analytics Consultant with a strong background in Business Intelligence, Data Engineering, and Analytics Engineering. Proficient in Microsoft Fabric, Qlik Sense, SQLMesh, and dlt, with a proven track record of delivering data-driven solutions that enhance business performance. Skilled in data modeling, ETL processes, and creating self-service analytics platforms. Committed to continuous improvement and leveraging data to drive strategic decision-making.

Open Source Contributions

SQLGlot github.com/tobymao/sqlglot Open-source SQL parser and transpiler. <ul style="list-style-type: none"> Added support for Microsoft Fabric SQL dialect. 	2025
SQLMesh github.com/TobikoData/sqlmesh Open-source data transformation and orchestration tool. <ul style="list-style-type: none"> Added support for Microsoft Fabric. 	2025
dltHub github.com/dlt-hub/dlt Open-source data ingestion framework. <ul style="list-style-type: none"> Added support for Microsoft Fabric. 	2025

Certifications

Microsoft Certified - Fabric Data Engineer Associate learn.microsoft.com/api/credentials/share/en-us/mattiasthalen/A2A3A7534C2AA848	Aug 2025
Microsoft Certified - Fabric Analytics Engineer Associate learn.microsoft.com/api/credentials/share/en-us/mattiasthalen/B2D8389746CF89A2	Sept 2024
dbt Developer credentials.getdbt.com/abdeb34d-9514-4e6d-af0a-24d30f3f51e0	July 2024
Qlik Sense Business Analyst www.credly.com/badges/8df065ec-b338-4800-bbb7-78375bf685c8	Mar 2024
Qlik Sense Data Architect www.credly.com/badges/a4622c11-aa2b-4916-bb63-98d28384db39	Mar 2024
Microsoft Certified - Azure Data Fundamentals www.credly.com/badges/65afb248-b4d8-4757-8435-35f8a141f32a	Feb 2023

Skills

Disciplines: Analytics Engineering, Data Engineering, Business Intelligence (BI)

Methodologies: Data Modeling, Data Warehousing, ETL/ELT, Unified Star Schema, Medallion Architecture, Hook Methodology

Languages: Python, SQL

Technologies: Microsoft Fabric, Qlik Sense, dbt, SQLMesh, dlt

Projects

Jaktia

2025

Tech Stack: Microsoft Fabric, dlt, SQLMesh

Developed the architecture using dlt (dltHub) for rapid and stable ingestion of source data, and SQLMesh (dbt alternative) for transforming the raw data up until consumption. Follows a medallion architecture where we first historize the raw data, then organize it around core business concepts using the Hook methodology and finally deliver a self-service unified star schema to be consumed in PowerBI / Excel.

Arctic Paper

2025

Tech Stack: Qlik Sense, dlt

Developed the architecture using dlt (dltHub) for ingestion. Qlik was used for the transformation. Follows the Analytical Data Storage System, where the first layer is according to how the system data looks. The middle layer is centered around how the business looks at the data; this is done by organizing it around core business concepts (the Hook Methodology). The last, and final layer is according to requirements, where we opted for the Unified Start Schema, due to it's rapid and self-service centered core values.

Avarn Security

2025

Tech Stack: Qlik Sense, QlikView

Maintenance of existing solution, both front- and back-end.

Volvohandlarförening

2025

Tech Stack: Azure SQL, Azure Data Factory, dlt

Maintenance and new development of existing solution. Focusing on good architecture and a layered approach. I.e., medallion architecture / analytical data storage system.

Swedish Government Agency

2024

Tech Stack: Qlik Sense

Qlik Sense developer and system administrator. Migrated business logic from Planacy to Qlik platform, improving reporting capabilities.

Life Science Corporation

2024

Tech Stack: Qlik Sense

Qlik Sense development and system administration. Executed data extraction migration from LIMS to Qlik, streamlining analytics processes.

Sveriges Kommuner & Regioner

2024

Tech Stack: QlikView

QlikView developer and system administrator. Developed solutions for comprehensive call statistics analytics.

Vinnova – Sweden's Innovation Agency

2023

Tech Stack: Qlik Sense

Qlik Sense developer and system administrator. Created data compilation solutions for annual finance reporting requirements. In charge of upgrading Qlik Sense.

Internationella Engelska Skolan

2023

Tech Stack: QlikView

Provided expert QlikView maintenance and development support, ensuring system stability and performance.
